Hi Mr. Baker,

I just wanted to forward some of the pictures I took of the clean up in the Bromide Mine area we have completed for the Unico group to date. I did not have a chance to visit with you concerning the actual citations, but it was not hard to find several clean up points. We removed old oil drums from near the creek bed at the Henrietta mine area and excavated that material away. We have repaired all roadways including the main road up the bottom of the canyon. We have hauled debris and refuse from the cabin site and the Bromide mine portal away to the landfill in Hanksville. We closed the Bromide mine portal, the El' Padre mine portal. We did not have a chance to close the Oro mine portal and the Crescent Creek mine portals as we were snowed out at that time. We did make a good progress on the entire site for clean up and the Unico people were there also.

I have sent you an amended notice for the May Day mill under Martinique Mining. I would like to meet with you and discuss this and an exploration notice I have prepared for the upper Martinique site. We have contracted with Rochoet refining and have a 4 million dollar exploration budget and I need to be prepared for this in spring.

We are also finishing up the purchase of the Bromide Basin from Kaibab mining. We need to discuss what you want for this site and we need to transfer permits and install bonding to cover everything here for everyone's files. Hope you had a great holiday and give me a call or e-mail me if you can fit me in for a meeting.

Thanks,

Kim E. Wilson
CEO Martinique Mining Corporation
